# Shipping Notes.

The steamer J. A. Cummins will sail from the Oceanic Co.'s wharf hereafter. She has been transferred to the Oceanic Steamship Co., and will sail under that Company's flag in the future.

The barkentine S. G. Wilder, Capt. Mc-Neill, arrived yesterday 19 days from San Francisco. The passage was an un-eventful one, having experienced nothing but fine weather throughout.

The American bark Detroit, Capt. Darrah, arrived from Nanaimo, B. C., yesterday with a load of about 2200 tons of coal. She was 36 days in making the trip, and, like the barkentine S. G. Wilder, reports nothing unusual on the passage.

D. H. NAHINU DEAD.

He Was a Veteran Hawaiian Public wai, Waikiki. Man.

Letters received by the steamer Mikabala brought news of the death of D. H. Nahinu at his home at Hookena, Hawaii, on last Wednesday. His death was caused by fever brought on by exposure. Mr. Na-hinu had reached the age of 65 years, having been born at Hookena in 1828. He was a member of the Legislature for several terms, in which capacity he was assiduous in looking after the interests of his constituency. Deafness interfered a good deal with his capacity in the last legislative session he attended, that of 1890. Mr. Nahinu was also a member of the Privy Council and one of the oldest members of the Hawaiian bar, and he filled many public offices in his district at various times. In church matters he was zealous, contributing liberally to church objects. Being possessed of considerable property he lived comfortably.

# Leads the Way!

Report of the Foreman Painter. Southern Pacific Co.

TANCRED, July 21, 1892. W. S. PALMER, Esq., Engineer of Dis-trict No. 1, So. Pacific Co. Dear Sir:-

I find that the oil requires much less pigment than linseed to make a paint of the requisite covering and spreading qualities. 100 lbs. of white lead will take no more than 4 to 4½ gals, of linseed, while in my priming coat, I get even better results with 9 to 10 gallons of Lucol, and in my second coat with 7 to 8 gallons of Lucol to 100 lbs. of lead. This means a very material saving (from one-third to one-half) in the amount of pigment necessary to cover a given surof pigment necessary to cover a given sur-

of pigment necessary to cover a given surface.

In my roof color I used less than 100 lbs. of "car paint" (Princes Metallic ground in oil) where a roof of this size has always required 200 lbs. of car paint with linseed oil. I mixed my roof color with 18 gallons of Lucol to the 100 lbs. of pigment and got a better body of color than I ever got with less than one-half that number of gallons of linseed. I give you simply the facts but I cannot understand or explain them.

The drying qualities of the new oil are perfect. The priming coat with white lead, dried strong and hard inside of 24 hours. The first coat for sand took the sand freely, firmly and in larger quantity than linseed and dried hard inside of 24 hours. The second coat of body color and trimming dried thoroughly without tack inside of 24 hours. It covered perfectly and dried with a line smooth surface entirely free from wrinkles and blisters, and bore out remarkably well so as to develop a fine lustre, given wrinkles and blisters, and bore out remarkably well so as to develop a fine lustre, giving much better looking results than I have ever gotten with two coats of linseed on new wood. The car paint spread on the roof was mixed with raw Lucol and dried perfectly in 24 hours. Notwithstanding that only one-half the usual amount of color was used, the paint covered perfectly and did not run. The second coat of sand filled up solidly, taking up a larger quantity of sand more evenly than I have ever gotten on to linseed.

The Lucol has effected a saving of 215 lbs. of pigment or nearly one-third of the amount usually required for a building of this size.

with respect to the general appearance of the finished work, I must confess that I never saw its equal in two coat work with linseed, and if the oil wears as well at Tancred as it has worn with the Master Car Painter, Mr. Fitch, at Sacramento, there can be no question about the SUPERIORITY of Lucol over linseed, even at the same price per gallon, in ECONOMY, GOOD LOOKS and in DURABILITY.

Yours Respectfully,
[Signed] W. H. MELLUS,
Foreman Painter, Southern Pacific Co.
